Portfolio

PROFESSIONAL SUMMARY

Final-year CS Engineering student with advanced **programming skills** specializing in **full stack development**, **cross-platform mobile engineering**, and **AI/ML integration**. Strong **communication skills** and **project management** experience in **software development** of **front-end and back-end** applications with **React Native**, **Supabase**, and **Python**. Seeking a role as a **Full Stack Engineer** or **Software Engineer**.

EDUCATION

• Visvesvaraya Technological University

B.E in Computer Science Engineering

Dec 2022 – June 2026 (Expected)

Hassan, India

• ASC Pre-University College

Pre-University Education

June 2021

Bengaluru, India

EXPERIENCE

• Software Engineer Intern

November 2025 – Present

Company: Scaleswift Digital Services LLP

Bangalore, India

- Engineered a cross-platform **software application** using **React Native**, **Expo SDK**, and **React Navigation**, applying **design patterns** and implementing **Supabase Auth** with **PostgreSQL Row Level Security (RLS)** for per-user data isolation.
- Architected a **platform-aware storage abstraction layer** bridging **MMKV (iOS)** and **localStorage (Web)**, designing **system architecture** with **Zustand** persist middleware for seamless **systems integration**.
- Integrated observability stack using **Sentry** for **troubleshooting** and **bug fixing**, **PostHog** for analytics and feature flags, and **Adapty** for subscription paywall management.

PROJECTS

• AI Movie Recommendation Engine

October 2025

Tools: Python, FastAPI, Gemini API (RAG), REST API, Uvicorn, Tailwind CSS, Firebase

- Developed** a **full-stack** web application using **Python** and **FastAPI** to create a secure **REST API** and **web services** layer, decoupling **back-end** logic from the responsive **HTML5/CSS front-end**.
- Implemented Retrieval-Augmented Generation (RAG)** using the **Gemini API** with Google Search Grounding for real-time, factually accurate recommendations. **Deployed on Render**.

• Health GPT: AI-Powered Predictive Healthcare

Aug 2025

Tools: TensorFlow, Keras, Flask, Docker, Logistic Regression, Decision Tree, CNN

- Built** a multi-modal diagnostic system using efficient **data structures**, training **CNNs** for image analysis and **Logistic Regression/Decision Trees** for tabular patient data.
- Created a scalable **RESTful API** using **Flask** with **performance testing**, containerized with **Docker** for environment-agnostic deployment.

• Zenith 2.0 – Personal Life OS

Dec 2025

Tools: React Native, Expo, Supabase, PostHog, OpenRouter, Clerk Auth

- Constructed a modular **micro-services** based **SOA** for **application development** using **React Native** and **Supabase**, consolidating Finance, Health, and Learning modules into a unified super-app with **biometric authentication**.
- Designed a fault-tolerant **AI Orchestration Layer** via **OpenRouter** to dynamically route queries across multiple LLMs (Gemini, Mistral) with automatic fallback logic.

SKILLS

- Programming Languages:** Python (Pandas, NumPy, asyncio), Java, JavaScript
- Frontend Development:** HTML5, CSS, React.js, React Native, Tailwind CSS, JavaScript Frameworks
- Backend Development:** FastAPI, Flask, Node.js, REST APIs, Zustand, Vercel
- AI/ML:** TensorFlow, Keras, Scikit-learn, NLP, Gemini API, OpenRouter
- Database Systems:** SQL, MySQL, MongoDB, MMKV, SQLite3, Supabase, PostgreSQL
- Tools & Platforms:** AWS, Git/GitHub, Sentry, Expo, PostHog, Adapty, Cloudinary, Postman
